

Project description
for Call 09I03-03-V04 Fellowships for excellent researchers R2-R4

The project description shall not exceed 2 pages.

Title of the project:

Name and surname, titles:

Category of researcher: R2-R3-R4

1. Excellence

Describe objectives of the project – they should be clearly defined, realistic, measurable and achievable in the implementation of the project. For each objective, please also indicate how it will be verified and evaluated (measurable deliverables).

Please briefly describe the current state in the area the project will focus on. How will the planned activities of the project address problems and challenges in this area? Why is necessary/appropriate to deal with such a project?

How does the project go beyond the currently available solutions, procedures, etc.? What makes it original and innovative?

The quality of two-way knowledge transfer between the researcher and the host organization: describe the links between the project and IGT SAS research focus (available at <https://ugt.saske.sk/en/>)

2. Impact

Show the assumption of a positive impact on the further career of the researcher, the assumption of a positive impact on the applicant/host organisation.

Explain the significance of the expected impact – on the given area of knowledge and the scientific community, on the economy, on society, on the environment.

Describe the adequacy of expected results and impact of the project – qualitative and quantitative.

3. Implementation

Quality and efficiency of the project plan, feasibility of planned activities. Describe the overall structure of the project plan, which consists of individual work packages, their interconnection, logical and chronological relation.

Capacities (personnel, professional, technical, infrastructure, other) of the host organisation. Is the project feasible using the current IGT SAS' infrastructure? <https://ugt.saske.sk/en/>

Describe the timeline of the project – specify project duration (max. 24 months) e.g., Gantt chart.

If applying for R3-R4, please state your team members positions (postdoc, technician, etc.).
